

Hard Drive Replacement Guide

Replace a hard drive to upgrade or replacement

Written By: Steven Park

INTRODUCTION

This guide is for replacing the hard drive on a Gateway LT2104u Laptop.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Hard Drive

- Use a Phillips #0 screwdriver to loosen the screws.

❗ The screws are designed to remain in the panel.

Step 2

- To open the panel, use a plastic opening tool or your finger.

⚠ If there is difficulty opening the panel, then the screws may not be loose enough.

Step 3

- Use the Phillips #0 screwdriver to unscrew the two 5mm screws.
- Remove the hard drive by using your fingers to pull firmly on the clear tab.

Step 4

- You have successfully removed the hard drive from the laptop.

To reassemble your device, follow these instructions in reverse order.
